TREATING EARLY FOR A HEALTHIER SMILE

Dr Elina Castro

Problems to watch for in Growing Children

Malocclusion("bad bites") like those illustrated below, may benefit from early diagnosis and referral to a dentist for an early intervention check-up.

Overbite

Anterior Open Bite

Oral Habits

Posterior Crossbite

Teeth Crowding

Tongue Thrust

Anterior Crossbite

Overjet

Crossbite of front teeth

The problems above can be related to Sleep Disordered Breathing and the earlier they are treated, the better the results are. We are a team of Dentists who are specifically interested in treating young children for proper growth and development of face and dentition.
